

CASE STUDY - PPE Work in Partnership with West African Based Company SRI EMAS Ltd

Client: SRI EMAS Ltd

Project: OCTP Gas Export Line **Location:** Ghana

Project Overview

African-based offshore contractor SRI EMAS Ltd, required the design and manufacture of subsea pig launchers and receivers to be deployed on OCTP's Gas Export Line Project.

Challenge

- SRI EMAS required a bespoke 26" temporary subsea pig launcher and receiver to be manufactured to strict international standards.
- The products had to be able to integrate seamlessly with the existing pipeline structure in place.
- The launcher and receiver needed to be delivered on time and within budget.
- Due to the nature of the project, the products had to be suitable for subsea use.

The Solution

- With vast experience in the industry, PPE successfully procured and purchased high quality materials at low cost to the client.
- The highly skilled and knowledgeable design teams at PPE were able to create the 26" temporary subsea pig receiver and launcher.
- Using the experience and knowledge gained from the industry, the engineering team were able to fabricate and manufacture the products to seamlessly integrate with existing pipework.

Why PPE

- PPE has over 80 years of combined experience in supplying pipeline solutions to oil and gas projects across the globe.
- With facilities spanning 56,000 sq ft, PPE possess the capabilities to supply a bespoke and full turnkey service from design to delivery for clients.
- Possessing an extensive portfolio of projects with high profile oil and gas clients, PPE's solutions have been deployed across the globe on major projects.
- Fully certified to ISO 9001:2015 standards, PPE operates in accordance with the highest standards in the industry.

Key Achievements

- Successful end to end completion of the project, meeting deadlines for delivery and adhering to a strict budget.
- The high-quality products created will ensure the pipes remain in good condition for successful transport of the gas.
- Providing a full service from its impressive facilities, PPE was able to create quality products in a short timeframe and at a low cost to the client.
